

BOOTH QUALITY METAL FINISHING

Booth Electro, Inc. has been in the metal finishing business since 1974 and can meet your plating needs in the following areas.

- **Electroless Nickel** - our specialty! A uniform coating that gives a plated hardness of 50 RC. We offer large size tanks to accommodate most part sizes.
ASTM-B-733-15, Mil-C-26074E
- **High Phosphorus Electroless Nickel** - superior corrosion resistance of 1/1000 of an inch (.001") can withstand 1000+ hours in a salt spray test.
ASTM-B-733-15, Mil-C-26074E
- **Gold** - barrel and rack, 24 karat gold to your specifications.
ASTM-B-488-11 / Mil-G-45204C
- **Silver** - barrel and rack from .000010" to .005", to give your parts the exact finish that you need.
ASTM-B-700-08 / QQ-S-365D
- **Tin** - barrel and rack ASTM-B-545-13 / Mil-T-10727C
- **Copper** - barrel and rack ASTM-B-734-97 / Mil-C-14550B
- **Duplex coatings** - most of our coatings can be combined to enhance the superior qualities of both coatings
- **Rush Service** - Need those parts yesterday? Try our rush service and get your parts back in as little as 24 hours!*
- **Substrates** that are currently coated at Booth include iron and steel alloys, copper alloys, aluminum alloys, and zinc die-cast. ASTM-B-183-79, ASTM-B-242-54. ASTM-B- 253-87, ASTM-B-254-92, ASTM-B-281-88, ASTM-B-320-60, ASTM-B-322-85
- * A minimum rush charge of \$15.00 will apply to orders that must be processed in less than 2 working days.
